Book of the day!

Early one morning a little spider begins to spin her web on a fencepost. In this multi-sensory book, children can feel the pictures as well as see them, while they hear or read the easy rhythmic text. Alongside the visual excitement of Eric Carle's vibrant collages of familiar animals is the tactile experience of feeling the spider's web as it grows from a simple line into a complex and beautiful creation - a perfect story for reading aloud and sharing.
